- Rxjs

PERSONAL PROJECTS

Manhole rescue system

04/2022 - 05/2022

- The ultimate goal of this system is to detect the victim using sensor and also to rescue them from the manhole in a very safe manner.
- The system consists of a holder to hold the victim and pull upwards in order to bring out from the manhole.
- The holder with the holding setup is connected to the motor in order to move up and down during the process of rescue operation.

Mobile detecting system

09/2021 - 10/2021

- This system has been designed to detect the availability of the mobile phones in the particular area of surroundings in which it has been placed.
- It consist of a sensor which detects the mobile phones in certain area in which it has been used.
- A small LED light is attached to the system in order to indicate the mobile detection response to the user.
